

Fodder and sugar beets

SF Gitty

High DM% fodder beet

SF Gitty is a newly released genetic monogerm hybrid type fodder beet. Offering the latest in beet breeding advancements, SF Gitty combines the agronomic benefits of high seed quality and plant evenness with the versatility traits of good bulb size and adequate proportion of bulb above ground.

SF Gitty's high DM% helps ensure impressive yields, while consistent/even bulbs make SF Gitty suitable for a range of grazing and harvesting systems.

Agronomic features:

- > Genetic monogerm hybrid variety
- > Versatile variety for grazing or self / mechanical harvesting
- > Distinctive pink consistent/even bulbs
- > High potential yields from high DM%

NEW RELEASE

Discuss your requirements with Seed Force.

Feed available

Substantial yields of high quality grazable or harvestable beets.

Stock suitability

Older animals when grazed in-situ, all types when lifted and fed.

Sowing rate for grazing

Precision sowing equipment

80,000-100,000

seeds per ha.

Sowing rate for harvesting

Precision sowing equipment

100,000-120,000

seeds per ha.
