

Fodder and sugar beets

SF 1505Bv

Medium - high DM% fodder beet

SF 1505Bv is a newly released genetic monogerm hybrid type fodder beet. It offers medium - high dry matter ensuring maximum yield potential.

SF 1505Bv will suit both grazing in-situ or self-harvesting, ensuring feeding system versatility.

It offers a high leaf:bulb ratio which helps make it suitable for a range of grazing systems.

Agronomic features:

- > Genetic monogerm hybrid variety with uniform tubular bulbs
- > Versatile variety for grazing or self-harvesting
- > High potential yields from medium - high DM%

Feed available

Substantial yields of high quality grazable or self-harvestable beets.

Stock suitability

All types whether grazed in-situ or self-harvested and fed.

Sowing rate for grazing/self-harvesting

Precision sowing equipment
80,000 - 100,000
seeds per ha
