

Fodder and sugar beets

SF Blaze

Low-medium DM% fodder beet

SF Blaze is a genetic monogerm type fodder beet with red roots.

SF Blaze fodder beet has a high percentage of bulb above the ground allowing easy stock access and high rates of utilisation. It suits a range of feeding systems.

Agronomic features:

- > Very high yielding variety with uniform bulbs
- > The roots of SF Blaze are high in energy
- > Well suited to in-situ feeding systems
- > Low-medium dry matter

Feed available

Substantial yields of high quality grazable or self-harvestable beets.

Stock suitability

All types whether grazed in-situ or self-harvested and fed.

Sowing rate for grazing/self-harvesting

Precision sowing equipment

80,000 - 100,000

seeds per ha
