

Fodder and sugar beets

SF Solidar

Low - medium DM% fodder beet

SF Solidar is a genetic monogerm hybrid type fodder beet. Its yellow-orange cylindrical bulbs are 50%+ above the soil, helping ensure good utilisation.

SF Solidar will suit all stock types for grazing in-situ and/or self-harvesting and should be used when a genetic monogerm variety is preferred. It offers low - medium dry matter bulbs making it suitable for most grazing systems and environments.

Agronomic features:

- > Genetic monogerm hybrid variety
- > Yellow-orange cylindrical bulbs
- > Versatile variety for grazing or self-harvesting
- > High yield potential with low - medium dry matter

Feed available

Substantial yields of high quality grazable or self-harvestable beets.

Stock suitability

All types whether grazed in-situ or self-harvested and fed.

Sowing rate for grazing/self-harvesting

Precision sowing equipment

80,000 - 100,000

seeds per ha
