Clovers

SF Narrikup

Subterranean clover

SF Narrikup is a very vigorous mid-late season subterranean clover. It offers tolerance to Red Legged Earth Mite (RLEM) and is an ideal companion for SF Rosabrook subterranean clover. By combining their two flowering dates (mid and late) helps ensure extended production.

Agronomic features:

- Mid season maturity
- Red Legged Earth Mite (RLEM) tolerance
- Ideal companion with SF Greenly II new generation cocksfoot
- For dryland permanent pasture
- Combine with SF Rosabrook

Feed available

Option for summer dry regions, mid-maturity offering spring to midsummer performance. Graze until flowering then reduce stocking rate to promote seed set.

Stock suitability

All stock types.

Sowing rate

10kg/ha
as the sole subterranean clover or

5kg/ha + 5kg/ha
SF Rosabrook in perennial pasture mixes.
