

## Permanent grasses

# SF Moxie

Diploid perennial ryegrass (0 days)

SF Moxie is one of the latest releases from Seed Force's perennial ryegrass development programme. Bred specifically for New Zealand conditions, its features will be sure to impress on farm. SF Moxie is a very productive diploid perennial with high yields, including exceptional winter growth. Its semi upright growth and high tiller density means it will fit well into systems requiring a highly productive perennial ryegrass. While its heading date (0 days), helps ensure good early season performance. Sow SF Moxie as the main grass component, or mix it with SF Hustle perennial ryegrass or SF Greenly II new generation cocksfoot for additional pasture resilience.

### Agronomic features:

- > Latest breeding for New Zealand conditions
- > High levels of winter production
- > Heading date of 0 days = early season growth
- > Diploid robustness
- > Semi upright growth habit
- > Bred with broad disease tolerance

### Feed available

Features excellent performance over the key growing seasons.

### Stock suitability

All stock types.

### Sowing rate

**15-20kg/ha**

Dependant on mix, use lower rate with SF Greenly II cocksfoot.

### Diploid/Tetraploid

**Diploid (2n)**

### Endophyte type

AR1
