

SF Jeronimo

Prairie grass

SF Jeronimo is a highly winter active prairie grass with a broad fit for pasture systems where rotational grazing is used. It is from Seed Force's extensive perennial grass research and development programme and was bred from a New Zealand selection.

Utilise SF Jeronimo's benefits as a grass component in lucerne/ grass mixes or as a companion grass species in permanent pasture mixes to help provide a balanced and resilient pasture sward. Highly palatable and productive, SF Jeronimo is suited to all livestock types.

Agronomic features:

- > Bred from New Zealand selection
- > High palatability and quality
- > Suited to permanent pasture mixes under rotational grazing
- > Winter activity and heat tolerant
- > Ideal grass companion for legumes, herbs and lucerne mixes

Feed available

Features good performance over the key growing seasons with high winter production.

Stock suitability

All stock types.

Sowing rate

20 - 30kg/ha

As main grass component in legume/herb mix.

4 - 8kg/ha

As companion grass component in permanent pasture mixes

5 - 15kg/ha

As grass component in lucerne mixes

Endophyte type

Without
